

Welcome to the Eco-Schools Australia newsletter for Term 2!

Everyone at Keep Australia Beautiful and Eco-Schools Australia would like to thank our wonderful participating schools, students and teachers for their support over the last few months.

We applaud your incredible spirits, ingenuity and creativity in working towards achieving your environmental goals during COVID-19.

As most schools across Australia ease into face-to-face learning, we have some fantastic **FREE** curriculum-linked lesson plans available for download to help you become Environmental Warriors!

Keep up the great work!

NEW Primary School Litter & Waste lesson plans available

These lessons are designed to educate students about how waste and recycling impact the environment, and how students can reduce their waste at home and school.

Students will be introduced to the three Rs - Reduce, Reuse, Recycle - encouraging them to reuse materials for other purposes, like a craft project using re-used material.

NEW High School Waste & Waterways lesson plans available

Water is an extremely valuable resource, especially in our changing climate. When students understand where water comes from and the processes involved in getting water, they will better understand how precious it is.

Our new *Waste & Waterways: Developing our Next Generation of Waterway Keepers* high school lesson plans outline the nature of waste in waterways (marine waste), describe the impacts it has and challenge students to devise solutions to respond to and minimise it.

Call for Lesson Plans for Positive Actions for SDGs

In 2019, The Foundation for Environmental Education (FEE) launched the Teachers' Lesson Plans for Positive Action Competition to appreciate the teachers' contribution and to inspire further engagement. The best lesson plans were chosen and will be published as best-practice examples in the upcoming FEE international publication.

This year we are inviting the teachers again to develop lesson plans for positive action for Sustainable Development Goals (SDGs) and participate in the competition.
